

# WORKSHOP SUMMERY AND REPORT

An Awareness Workshop on Water Conservation at pollution Areas

**Theme: “Water Conservation”**

## 1. Introduction:

Multipurpose Awareness Society organized an awareness workshop on the theme of “Water conservation” at IDA Jeedimetla, Hyderabad on March 22, 2016 involving NGO’s leaders and Students.

## 2. Specific objectives of the workshop:

- To create an attitude towards water conservation, management and development so that a behavioral change can be created amongst all stakeholders.
- To drive people to take part in water conservation and development activities in their places.
- To provide for a platform to discuss and learn water conservation, management and development techniques and also discuss the concerns for posterity.
- To motivate people towards sustainable use of water and other natural resources through optimum utilization.
- To promote the use of water efficiently in agriculture and domestic use to enhance productivity
- Creating a network of field professionals and stakeholders for future activities.

## 3. Summary Report on Proceedings:

**Introductory session:** Welcome to resource persons and participants, offering bouquets, shawls and mementos to resource persons. Workshop objectives, subject covered.

**Three technical sessions:** lectures, followed by question-answer sessions.

**Sharing of knowledge and experience Session:** Open discussion and sharing of experiences and knowledge.

Vote of thanks:

## 4. Details of Subjects Covered:

1. Impact of climate change on water resources.
2. Water-use efficiency.
3. Water management for irrigation and need to conserve water sustainable development.
4. Water conservation and
5. Rain-water harvesting.

## 5. Summary of Outcomes and Way Forward:

- In some parts of India, water has become a political issue, in some social issue and a question of life and death.
- Government of India and state governments have been doing to resolve the issues related to water but situations have been aggravated year by year.
- Rivers are being polluted and contaminated year by year but due to lack of our consciousness towards rivers, our water bodies and sources are being contaminated.

**Workshop with NGO's Leaders and local people**
